

Sunshine Oilsands Ltd.
Job Description

POSITION: Millwright Consultant

Sunshine is a Calgary based public corporation, listed on the Hong Kong Stock Exchange since March 1, 2012. The Company is focused on the development of its significant holdings of oil sands leases in the Athabasca oil sands region. Sunshine owns interests in oil sands and petroleum and natural gas leases in the Athabasca region of Alberta. The Company is currently focused on executing milestone undertakings in the West Ells project area. West Ells has an initial production target rate of 5,000 barrels per day

This is a full time, contract position, based out of Sunshine Oilsands Ltd.'s West Ells Field Office. The schedule is 14 days on/14 days off.

JOB DUTIES AND RESPONSIBILITIES:

The incumbent will report to the Senior Reliability Engineers. The Millwright Technician is responsible for all aspects of maintenance and repair of mechanical equipment to ensure both short and long term safe, reliable and cost effective production in accordance with company policies and relevant government standards and codes.

Responsibilities of this role include, but are not limited to:

- Perform rotating equipment maintenance, repair, overhaul, install, dismantle, modify, replace, adjust, test, clean and etc.;
- Mechanical representation in walk-downs of completed construction/modification;
- Involvement in Modification shop tours for quality assurance;
- Use, inspect and maintain rigging and hoisting equipment to ensure a safe work environment during transfer and installation of equipment;
- Provide rotating equipment technical support to West Ells project with a focus on safe, reliable and efficient operation;
- Develop critical spare part inventory for West Ells Facility;
- Ensure consistent application and compliance of Sunshine Oilsands technical standards and industry standards;
- Monitor major rotating equipment for performance and prediction using vibration analysis, oil analysis and other tools;
- Support troubleshooting and equipment failure root cause investigations;
- Conduct preventative and planned maintenance and running repairs on equipment;
- Setting up lubrication and inspection schedules for all rotating equipment;
- Track and identify all mechanical changes on plant documentation;
- Provide direction and supervision to contract personnel performing maintenance as required;
