The address of the principal place of business for Sunshine Hong Kong is Unit 8504A, 85/F, International Commerce Centre 1 Austin Road West, Kowloon.

The Company is engaged in the evaluation and the development of oil properties for the future production of bitumen in the Athabasca oilsands region in Alberta, Canada. The Company is a development stage company. The continued existence of the Company is dependent on its ability to maintain capital funding for further development and to meet obligations. In the event that such capital is not available to the Company, it will be necessary to prioritize activities, which may result in delaying and potentially losing business opportunities and cause potential impairment to recorded assets.

2. Basis of preparation

Going Concern

These condensed interim consolidated financial statements have been prepared on a going concern basis. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business. For the six month period ended June 30, 2016, the Company reported a net loss of $23.5 million. At June 30, 2016, the Company had negative working capital of $311.0 million including the $258.7 million current portion of the senior secured notes (Note 10) and an accumulated shareholders' deficit of $657.3 million. The Company's trade payables total $23.8 million at June 30, 2016. Included in trade payables are $20.5 million of payables that are greater than 60 days. Subsequent to June 30, 2016, the Company raised gross equity proceeds of $31.4 million and entered into a forbearance agreement (Note 22).

The Company's ability to continue as a going concern is dependent on achieving profitable operations and the ability to refinance current debt and access immediate additional financing. There can be no assurance that the steps management will take will be successful. As such there is significant doubt and there can be no assurance the Company will be able to continue as a going concern.

2.1 Statement of compliance

The condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in accordance with International Accounting Standard ("IAS") 34, "Interim Financial Reporting" as issued by the International Accounting Standards Board ("IASB"). The financial statements have been prepared on the same basis and using the same accounting policies and methods as those used in the annual consolidated financial statements for the year ended December 31, 2015. The condensed interim consolidated financial statements are presented in Canadian Dollars ("$"), which is the functional currency of the Company.

On August 8, 2014, the Company completed an offering of US$200 million senior secured notes (the "Notes") at an offering price of US$938.01 per US$1,000 principal amount. The Notes bear interest at a rate of 10% per annum and have a potential maturity date of August 1, 2017, if certain conditions are met as explained below. Interest payments are payable semi-annually on February 1 and August 1 of each year.

If by February 1, 2016, the Company had not: (1) received at least US$50 million of net cash proceeds from one or more equity offerings; and (2) deposited, or caused to be deposited, cash in an amount sufficient to pay: (a) one year of interest payments on the aggregate principal amount of Notes outstanding on February 1, 2016; and (b) the yield

10. Long-term debt (Continued)

premium, then the final maturity date of the Notes shall be August 1, 2016. The Company did not meet the requirements listed above by February 1, 2016, and as a result the final maturity date of the Notes will be August 1, 2016. The Company has presented the Notes as a current liability on the Condensed Interim Consolidated Statements of Financial Position as at June 30, 2016.

The Company entered into a forbearance agreement with all of the Noteholders of the Notes (the "Noteholders") maturing on August 1, 2016. On August 11, 2016, the Company had entered into a further forbearance agreement (the "Second Forbearance Agreement") with all of Noteholders. Pursuant to the Second Forbearance Agreement, each of the Noteholders has agreed not to enforce its rights in respect of the Notes prior to 2:00 p.m. (New York time) on August 15, 2016, subject to certain restrictions, in order to provide the Corporation and the Noteholders with additional time to finalize definitive documentation effecting, among other things, entering into a term loan facility that extends the maturity date of the indebtedness owed to the Noteholders to August 1, 2017. There can be no assurance provided that the Notes will be extended as described above. Pursuant to the Second Forbearance Agreement, Sunshine had paid to the Noteholders all installment of interest due on the Notes on August 1, 2016 in the amount of US$10 million.

The Company is required to pay to the holders 10% interest on the outstanding Notes on August 1, 2016, and a yield maintenance premium of 7.298% of the aggregate principal amount of Notes. The Company may redeem the Notes at any time before August 1, 2016, under the optional redemption section of the Note Indenture. The optional redemption schedule requires the Company to pay a percentage of the principal amount of the Note. The percentage ranges from 100.000% at August 31, 2015 and increases monthly to July 31, 2016, at which point the percentage is 106.615%. If the Company does not redeem before the maturity date of August 1, 2016, the Company upon maturity will only pay the 7.298% yield maintenance premium. At June 30, 2016, the optional redemption percentage, which is effectively an accrued yield maintenance premium, was 105.952% and accordingly the Company has recorded a yield maintenance premium based on this percentage. The total accrued liability for this premium is $15.5 million as at June 30, 2016 (December 31, 2015 - $6.2 million) and $9.3 million is recorded in the Condensed Interim Consolidated Statements of Operations and Comprehensive Loss for the six month period ended June 30, 2016 (year ended December 31, 2015 - $6.2 million).

The Notes contain various non-financial covenants which, among other things, restrict the Company with respect to certain capital expenditures and payments, making investments and loans, incurrence of additional debt and issuance of certain preferred stock, paying dividends, altering the nature of the business and undertaking certain corporate transactions. A reporting covenant also exists which requires standard reporting in line with a reporting issuer under Canadian Securities Legislation and includes timely reporting of material changes.

At June 30, 2016, the Company had incurred $8.8 million (US$6.8 million equivalent using the period end exchange rate) in liens during the ordinary course of business. There is a basket for permitted liens not to exceed US$5.0 million, but the Company was in excess of this US$5.0 million limit as at June 30, 2016. The Note Indenture also permits liens incurred in the ordinary course of business that are imposed by law. It is possible that the US$6.8 million in liens existing as at June 30, 2016 may be sheltered by one or both of these exceptions, but there is also a possibility that the Company is not in compliance with these exceptions as at June 30, 2016. In any event, no Event of Default (as defined in the Note Indenture) has occurred. From time to time, the Company receives liens or claims on accounts payable balances. The Company continues to work toward resolution of any liens or claims.

The Note Indenture allows the Company to incur additional indebtedness in an aggregate principal amount not to exceed US$5.0 million (the "Permitted Debt"). The Company had asked for consent from a majority note holders, effective as of April 14, 2016, to amend the Note Indenture to increase the amount of Permitted Debt from US$5.0 million to US$15.0 million. A majority of the Note holders agreed to this amendment as of May 11, 2016. As of June 30, 2016, the Company had incurred unsecured debt for a total of US$5.3 million (CDN$6.9 million equivalent) which is considered Permitted Debt.

The Notes are translated into Canadian dollars at the period end exchange rate of $1US = 1.3009CDN.

Based on current market conditions and low utilization rates for drilling rigs, management concluded the future benefits of the contract are not currently quantifiable to offset its obligations under the contract. In future periods, if the drilling rig is utilized the provision will be adjusted accordingly.

17. Financial instruments

17.1 Capital risk management

The Company can be exposed to financial risks on its financial instruments and in the way that it finances its capital requirements. The Company manages these financial and capital structure risks by operating in a manner that minimizes its exposure to volatility.

The Company's strategy is to access sufficient capital, through equity issuances, joint ventures and the utilization of debt, in order to maintain a capital base for the objectives of maintaining financial flexibility and to sustain the future development of the business. The Company manages its capital structure in order to continue as a going concern and makes adjustments relative to changes in economic conditions and the Company's risk profile. In order to manage risk, the Company may from time to time issue shares and adjust its capital spending to manage current working capital

17.1 Capital risk management (Continued)

levels. The Company expects its current capital resources will not be sufficient to complete its development plans through the next twelve months and will be required to raise additional funds through future equity or debt financings, a joint venture or a sale of assets. The Company's ability to continue as a going concern is dependent on achieving profitable operations and the ability to refinance current debt and access immediate additional financing.

The Company's capital structure currently includes shareholders' equity and working capital deficiency as follows:

		June 30, 2016		December 31, 2015
Working capital deficiency	$	311,024	$	286,121
Shareholders' equity		595,286		604,098
	$	906,310	$	890,219

The working capital deficiency of $311.0 million at June 30, 2016 (December 31, 2015 – $286.1 million), includes the $258.7 million (December 31, 2015 - $266.3 million) current portion of the Notes and $6.9 million (December 31, 2015- Nil) director's loan. There was no change in the Company's objectives and strategies of capital management for the six month period ended June 30, 2016.

17.3 Fair value of financial instruments

Level 1 fair value measurements are based on quoted prices in active markets. Level 2 fair value measurements are based on valuation models and techniques where the significant inputs are derived from quoted prices or indices. Level 3 fair value measurements are based on unobservable information.

The fair value of cash, restricted cash and cash equivalents, deposits, trade and other receivables, trade and accrued liabilities and the shareholder loan approximate their carrying values due to their short term maturity and were assessed on a level 1 fair value measurement.

The fair value of share purchase warrants and long term debt have been assessed on a level 2 fair value measurement.

17.4 Financial risk management

Financial risks include market risk (including currency risk, interest rate risk, and price risk), credit risk, liquidity risk and cash flow interest rate risk. The Company does not use any derivative financial instruments to mitigate these risk exposures. The Company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

17.5 Market risk

Market risk is the risk that changes in market prices will affect the Company's net loss. The objective of market risk management is to manage and control market risk exposures within acceptable limits. There have been no changes over the prior year to the Company's objectives, policies or processes to manage market risks.

17.5 Market risk (Continued)

Commodity price risk is the risk that the value of future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum are impacted by world economic events that dictate the levels of supply and demand. The Company has not attempted to mitigate commodity price risk through the use of various financial derivative or physical delivery sales contracts.

17.6 Currency risk

The Company is exposed to risks arising from fluctuations in foreign currency exchange rates. Thus, exchange rate fluctuations can affect the fair value of future cash flows. This exposure primarily relates to certain expenditure commitments, deposits, accounts payable and long term debt which are denominated in US dollars and/or HK dollars. The Company manages this risk by monitoring foreign exchange rates and evaluating their effects on using Canadian or U.S. vendors as well as timing of transactions. The Company had no forward exchange rate contracts in place as at or during the three and six month periods ended June 30, 2016. If exchange rates to convert from US dollars to Canadian dollars had been one percent higher or lower with all other variables held constant, foreign cash and restricted cash held at June 30, 2016 would have been impacted by $Nil and the carrying value of the long term debt at June 30, 2016 would have been impacted by approximately $2.5 million. At June 30, 2016, the Company held approximately US $Nil of restricted cash and US$0.1 million or $0.2 million of cash, using the June 30, 2016 exchange rate of 1.3009, as cash, restricted cash and cash equivalents in the Company's US bank account.

For Hong Kong dollar amounts, exchange rates to convert from HK dollars to Canadian dollars had been one percent higher or lower with all other variables held constant, foreign cash held at June 30, 2016 would have been impacted by HK$0.1 million. At June 30, 2016, the Company held approximately HK$11.1million or $1.8 million using the June 30, 2016 exchange rate of 5.9645, as cash in the Company's HK$ bank account.

The following table summarizes the components of the Company's foreign exchange (gains)/losses:

	For the three months ended June 30, 2016	For the three months ended June 30, 2015	For the six months ended June 30, 2016	For the six months ended June 30, 2015

Realized foreign exchange loss (gain)	(6)	10	557	1,190
Total foreign exchange loss (gain)	$ 2,038	$ (3,150)	$ (14,050)	$ 13,357

17.7 Interest rate risk management

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. As at June 30, 2016, the Company does not have any floating rate debt.

The Company's cash consists of cash held in bank accounts that earn interest at varying interest rates. Future cash flows from interest income on cash will be affected by interest rate fluctuations. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values or result in material interest rate risk. The Company manages interest rate risk by maintaining an investment policy that focuses primarily on preservation of capital and liquidity. For the three and six month periods ended June 30, 2016, the interest rate earned on cash was between 0.1% and 1.55%.

17.8 Credit risk management

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's cash, deposits and receivables and GST receivables. As at June 30, 2016, the Company's receivables consisted of 4% from Goods and Services Tax receivable, 76% joint interest billing receivable and 20% from other receivables (December 31, 2015 – 45% from Goods and Services Tax receivable, 39% from joint interest billing receivable and 16% from other receivables).

The Company's unrestricted cash as at June 30, 2016, is held in accounts with third party financial institutions and consists of invested cash and cash in the Company's operating accounts.

At June 30, 2016, there was no allowance for doubtful accounts receivable and the Company did not provide for any doubtful accounts nor was it required to write-off any receivables, as no receivables were considered impaired (December 31, 2015 - $Nil). The Company considers any amounts outstanding in excess of 30 days past due.

17.9 Liquidity risk management

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's approach to managing liquidity risk is to plan that it will have sufficient liquidity to meet its liabilities when due, using either equity or debt proceeds. At June 30, 2016, the Company had negative working capital of $311.0 million and an accumulated deficit of $657.3 million. The Company's ability to continue as a going concern is dependent on achieving profitable operations and the ability to refinance current debt and access additional financing.

The Company utilizes authorizations for expenditures to manage its planned capital expenditures and actual expenditures are regularly monitored and modified as considered necessary.

The timing of cash outflows (excluding interest) relating to financial liabilities as at June 30, 2016, are as follows:

	Total	**Less than 90 days**	**Less than 1 year**
Trade and accrued liabilities	$ 54,096	$ 54,096	$ -
Shareholder Loan	6,941	6,941	-

1. Principal amount of Notes based on the period end exchange rate of $1 US = 1.3009CDN

18. Related party transactions

Balances and transactions between the Company and its subsidiaries, who are related parties, have been eliminated on consolidation.

18.1 Trading transactions

The Company's Executive Chairman, Mr. Kwok Ping Sun, has purchased securities of the Company (Note 13.1), and he has also loaned the Company funds on an unsecured basis.

On January 19, 2016 the Company signed an unsecured loan agreement (the "Loan") with Tai Feng Investments Limited ("Tai Feng"). Tai Feng is 100% owned by Mr. Kwok Ping Sun, the Company's Executive Chairman. The Loan is considered Permitted Debt under the Company's Notes as long as it does not exceed US$5.0 million. The Second Loan balance at June 30, 2016 is HK$3.4 million (approximately $0.57 million).
